Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 24 September 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1, 2 and 4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hirano (2001030886).

As per claims 1 and 4, Hirano teaches a brain wave detector for detecting a central beta rhythm of a driver's brain waves appearing before the driver's movement to step on a brake pedal after the step of determining driving conditions; a brain wave amplifier for amplifying the brain waves detected by the brain wave detector; and a controller for sensing the driver's movement for braking by analyzing the brain waves and generating a command for braking the vehicle (abstract).

Hirano does not teach an A/D converter for converting the brain waves amplified by the brain wave amplifier into a digital data. However, it would have been obvious to one skill in the art to use an A/D in order to convert the signals to digital.

As per claim 2, it would have been obvious to one skill in the art to attach a means to the driver's scalp in order to get the appropriate response and/or signal from the driver.

3. Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hirano (2001030886) in view of Kirkup et al (6,175,762).

Hirano does not teach comparing the brain signals with a predetermined threshold and generating a command. However, Kirkup teaches it in column 3. Therefore, it would have been obvious to one skill in the art to combine the aforementioned inventions in order to allow a person to activate an electrical appliance or device through self-control of EEG signals without the training that biofeedback requires.

Allowable Subject Matter

4. Claims 3, 5 and 6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Olga Hernandez whose telephone number is (703) 305-0918. The examiner can normally be reached on Monday through Friday from 8:30 am to 5:00 pm.
